Full Stack Web Developer

Professional Summary

Proactive Full Stack Web Developer proficient in JavaScript and experienced in the MERN stack. Collaborative team player translating project requirements into efficient web applications. Expertise in Node.js, Express.js, and React.js for scalable APIs and frontend components. Knowledge of MongoDB and RESTful API design optimizing database models for seamless integration.

Projects

Furni Flex [Live Demo Link](#) [Github Repo Link](#)

JavaScript React Redux Git Chakra UI

- Created a responsive landing page with Chakra UI for improved user experience.
- Utilized Redux to develop and integrate product components for efficient data flow.
- Implemented routing setup to ensure smooth navigation across pages.
- Enhanced interface consistency and user accessibility throughout the application.
- Developed a responsive and dynamic website featuring user authentication, an admin dashboard with CRUD operations, coupons generation, property favorites, search and filter functionality, private routes, and cart functionality.

TaptiBnB [Live Demo Link](#) [Github Repo Link](#)

JavaScript Git HTML5 CSS3 Bootstrap

- Developed Product Cards: Implemented dynamic product cards displayed on the homepage by using JavaScript to fetch data from APIs, ensuring real-time updates and interactivity.
- Enhanced User Experience: Added a wishlist functionality to the product cards, allowing users to easily save and manage their favorite items.
- Integrate Authentication: Added User authentication with registration and login functionality.
